DETAILED ACTION

Claim Objections

Claim 1 is objected to because of the following informalities: There is insufficient antecedent basis for the following limitations in the claim: “the surface”, “said surface”, “the distance”, “said buried layer junction”, “the remainder”, “said surface regions”, and “the depth”. Furthermore, it is unclear if term “depth” referred to in the limitation “said isolation zone having a depth of 300 to 400 nm” is the same as “the depth” referred to earlier in the claim. It is suggested the above limitation be changed to read “wherein the depth of said isolation zone [having a depth of] is from 300 to 400 nm.”

In regards to claims 3 and 6, there is insufficient antecedent basis for “the resistivity range”.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In regards to claim 1, the limitation “extending vertically from said surface regions” renders the claim indefinite. It is unclear what is extending from the regions. Also, does this mean the element extending vertically is in contact with the surface regions?

Art Unit: 2815

Allowable Subject Matter

Claims 1-7 would be allowable if rewritten or amended to overcome claim objections and the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Iranmanesh and Marum disclose bipolar transistor structures with a buried collector layer and base and emitter portions surrounded by a well.
